

NUTRITION & ALLERGEN GUIDE

The nutrition information listed here is based on standard recipes and is shown as single serving portion. Slight variations may occur due to seasonal changes or use of an alternate vendor. Addition of proteins and/or other food items will alter nutrition values. Freshii, its franchisees and its employees do not assume responsibility for any sensitivity or allergy to any food product provided in our restaurants. We strive for continuous quality improvement and often try new products. Therefore, nutritional content is subject to change.

OUR MOTTO: COUNT NUTRIENTS, NOT CALORIES

Not all calories are created equal. Some calories are healing, some are harming. Some calories are metabolism-boosting, while others boost blood sugar. The same number of calories from different types of food can influence the body in different ways.

At Freshii, we believe it's important to eat the **RIGHT** type of calories that energize your body and make you feel **GOOD**. We follow a nutrient-based approach to eating: serving a menu focused on food quality, not quantity. At Freshii, we count nutrients over calories, and here's why:

1. COUNTING CALORIES CAN LEAD TO THE CONSUMPTION OF THE WRONG TYPE OF CALORIES

If you're only keeping the number of calories in mind, it is easy to forget about the other components of a food and the effect they can have on the body. Consider a 100-calorie apple versus a 100-calorie candy bar. Viewing them as the same because they hold an equal number of calories can lead us to make poor food choices. The candy bar offers little to no nutritional value, while the apple provides vitamins, minerals, and fiber to help the body process the calories consumed.

2. COUNTING CALORIES IGNORES FOOD QUALITY

Calorie counting does not consider if a food is natural and unprocessed, or distinguish between the type of fat, protein and carbohydrates it contains. Calories from complex carbohydrates, such as whole grains and vegetables, will help to maintain blood sugar levels and provide the body with sustained energy. Simple carbohydrates, such as refined grains and added sugars, will have the opposite effect, spiking insulin levels and contributing to increased cravings and appetite.

3. COUNTING CALORIES CAN ENCOURAGE THE RESTRICTION OF NUTRIENT-DENSE FOOD

Some of the most nutritious food on the planet is also the most caloric. Although calorie-dense, foods such as avocados, nuts and seeds contain essential fats, vitamins and minerals to support a healthy weight and metabolism. The nutritional benefit from these foods far outweigh the number of calories they contain.

We believe that if you focus on eating healthy food, you don't have to count calories. As long as you fuel yourself with the proper energy and nutrients, your body will take care of the rest - which includes keeping you at a healthy weight.

If you can't already tell, we love calories (the good ones at least). However, we also understand that at times, monitoring your calorie intake may be necessary. For those calorie-conscious individuals, we've got a few suggestions to help you achieve your goals while energizing at Freshii...

MORE GREENS, LESS GRAINS

Quinoa and brown rice are known for their impressive health profiles, but can also be quite calorie-dense if consumed in large amounts. When ordering your favourite bowl, upgrade to a kale base or opt for half grains, half greens.

PACK ON PROTEIN

Protein-rich foods are highly satiating, leading to reduced hunger and cravings. Be sure to include lean proteins with your Freshii menu items - choose from chicken, tofu, falafel, hard-boiled eggs and beans.

DITCH THE DAIRY

Cheese is an excellent source of calcium, but no matter which way you slice it, most cheese is high in calories and fat. If you're mindful of numbers, substitute the cheese for non-dairy sources of calcium such as broccoli or kale.

DON'T GO NUTS

Nuts are packed with nutrients, but they are also packed with calories and (healthy) fats. Incorporate nuts into your daily diet in order to reap their nutritional benefits, but remember that portion control is key - ask for a half serving.

DRESS LIGHTLY

We prepare our salad dressings fresh in-house with heart-healthy oils. Ask for your menu item to be lightly dressed or use balsamic vinegar or lemon juice in place of dressing.

Your certified Freshii Nutritionist is Andie.
